

Dear FCC Commissioners & Staff:

I do beleve that you would be making a terrrible mistake by letting just few big ISPs run the show. I subscribe to an indpendent ISP, Iglou, and have had one of the biggies,Bel South, before. There is no comparison between them. Bell south gave little or no tech. support when needed it plus I was on hold more than I was on the internet. Please don't force the smaller guys out. They provide a lot better service and at a better price than the biggies.

Sincerely,

Charles N. Brown
